SUMMARY

Junior Back-End Developer with hands-on experience building web applications using PHP, Laravel, and MySQL. Focused on writing clean code, understanding backend logic, and continuously improving through real projects.

EDUCATION

Bachelor's Degree in Pharmacy 09/2016 – 07/2021
Mansoura University

National Telecommunication Institute (NTI) 06/2026 – 08/2026
Mansoura University Branch

SKILLS

- PHP
- MySQL
- PHPMyAdmin
- CSS
- Bootstrap
- Postman
- GitHub
- Swagger
- Laravel
- XAMPP
- HTML
- JavaScript
- jQuery
- Git
- RESTfulAPIs

LANGUAGES

Arabic
Native or Bilingual Proficiency

English
Professional Working Proficiency

Spanish
Conversational

COURSES

The Complete Full-Stack Web Development Bootcamp

PHP for Beginners - Become a PHP Master - CMS Project

Laravel 8 Beginner to Advance with Complete News Portal

Laravel 2019, the complete guide with real world projects

Laravel 8 PHP Framework A - Z Build Professional Ecommerce

Laravel 8 - Advance Course Build School Management System

PERSONAL PROJECTS

Gym Management System 09/2026 – 10/2026
Team Project - DevNova Community
- Contributed to a multi-tenant SaaS REST API for managing gyms where each gym's data is isolated, in a team of 4 members.

- Built the Members, Plans, Subscriptions, Staff, Shifts, Staff Attendance, and Equipment modules following a Repository–Service–Controller architecture with request validation.
- Implemented role-based access control with custom middleware across all my modules, restricting each endpoint to the roles allowed to use it.
- Added shift-conflict detection to prevent overlapping shifts for the same employee on the same date.
- Implemented a computed maintenance_status (overdue / due_soon / ok) to alert gym owners about upcoming equipment maintenance.
- Technologies: Laravel, MySQL, RESTful APIs, JWT, Postman, Git/GitHub.

Ecommerce RESTful API 06/2026 – 06/2026

- Developed a RESTful API for an e-commerce platform using Laravel and JWT authentication. Applied Generic Response Wrapper and Exception Handler for unified API responses.
- Implemented CRUD operations for Categories, Sub-Categories, and Products modules.
- Integrated Swagger documentation for API endpoints.
- Technologies: Laravel, MySQL, JWT, Swagger.

News Portal 03/2026 – 04/2026

- Developed a dynamic news portal with a robust Laravel and MySQL backend, supporting 10+ core features and designed to engage thousands of daily visitors.
- Integrated and dynamically displayed diverse widgets (e.g., advertisements, live TV, prayer calendar) and implemented distinct themes for both admin and client interfaces, enhancing user experience and content delivery.
- Technologies: Laravel, MySQL, Bootstrap, JavaScript, AJAX, RESTful APIs, Postman, Git/GitHub.

School System 01/2026 – 03/2026

- Developed a School ERP system using Laravel and MySQL to manage student and employee data across multiple modules including academics, attendance, and finance.
- The backend dynamically serves data to both admin dashboards and client-side interfaces.
- Technologies: Laravel, MySQL, Bootstrap, JavaScript, AJAX.

Ecommerce System 09/2025 – 11/2025

- Developed a full-featured e-commerce platform with paginated data loading on the frontend and integration of 3 payment methods.
- Implemented two distinct themes for admin and client interfaces.
- Technologies: Laravel, MySQL, Bootstrap, JavaScript, AJAX.
